

ADMINISTRATION OF MEDICATION POLICY

Help for non-English speakers

If you need help understanding the information in this policy, please contact Port Phillip Specialist School on 96460855

PURPOSE

To explain to parents/carers, students and staff the processes Port Phillip Specialist School will follow to safely manage the provision of medication to students while at school or school activities, including camps and excursions.

SCOPE

This policy applies to the administration of medication to all students. It does not apply to:

- the provision of medication for anaphylaxis which is provided for in our school's Anaphylaxis Policy
- Specialised procedures which may be required for complex medical care needs.
- the provision of medication for asthma which is provided for in our school's Asthma Policy

POLICY

If a student requires medication, Port Phillip Specialist School encourages parents to arrange for the medication to be taken outside of school hours, wherever it is possible. However, Port Phillip Specialist School understands that students may need to take medication at school or school activities. To support students to do so safely, Port Phillip Specialist School will follow the procedures set out in this policy.

Authority to administer If a student needs to take medication while at school or at a school activity:

- Parents/carers will need to arrange for the student's treating medical/health practitioner to provide written advice to the school which details:
 - the name of the medication required
 - the dosage amount
 - the time the medication is to be taken
 - how the medication is to be taken
 - the dates the medication is required, or whether it is an ongoing medication
 - how the medication should be stored.
- In most cases, parents/carers should arrange for written advice to be provided in a Medication Authority Form which a student's treating medical/health practitioner should complete
- If advice cannot be provided by a student's medical/health practitioner, the principal (or their nominee) may agree that written authority can be provided by, or the Medication Authority Form can be completed by a student's parents/carers.

- The principal may need to consult with parents/carers to clarify written advice and consider the student's individual preferences regarding medication administration (which may also be provided for in a student's Student Health Support Plan). Parents/carers can contact the school office for a Medication Authority Form.

Administering medication

Any medication brought to school by a student needs to be clearly labelled with:

- the student's name
- the name and strength of the medication
- the dosage required
- the time the medication needs to be administered.
- and be in the original packaging with the prescription/pharmacy label clearly readable

Parents/carers need to ensure that the medication a student has at school is within its expiry date. If school staff become aware that the medication a student has at school has expired, they will promptly contact the student's parents/carers who will need to arrange for medication within the expiry date to be provided.

Self-administration

In some cases, it may be appropriate for students to self-administer their medication. The principal may consult with parents/carers and consider advice from the student's medical/health practitioner to determine whether to allow a student to self-administer their medication. If the principal decides to allow a student to self-administer their medication, the principal may require a written acknowledgement from the student's medical/health practitioner, or the student's parents/carers that the student will self-administer their medication.

Storing medication

The principal (or their nominee) will put in place arrangements so that medication is stored:

- securely to minimise risk to others
- in a place accessible by staff who are responsible for administering the medication
- away from a classroom (unless quick access is required)
- according to packet instructions, particularly in relation to temperature.

For most students, Port Phillip Specialist School will store student medication in a locked cabinet in the sick bay. The principal may decide, in consultation with parents/carers and/or on the advice of a student's treating medical/health practitioner:

- that the student's medication should be stored securely in the student's classroom if quick access might be required
- to allow the student to carry their own medication with them, preferably in the original packaging if:

- the medication does not have special storage requirements, such as refrigeration
 - doing so does not create potentially unsafe access to the medication by other students.

- All medication that is required to be administered at school must be given directly to a staff member in the office and collected by an adult. Under no circumstances should medications travel to and from school in a student’s school bag and/or on the school bus, with the exception of emergency medications such as Ventolin inhalers for asthma and EpiPens for anaphylaxis.

- In instances where a student may be travelling directly from respite to school, or from school to respite, the student’s carer or guardian must organise the storage and collection of medication directly with respite.

Warning

Port Phillip Specialist School will not:

- in accordance with Department of Education and Training policy, administer analgesics such as aspirin and paracetamol as a standard first aid strategy as they can mask signs and symptoms of serious illness or injury
- allow a student to take their first dose of a new medication at school in case of an allergic reaction. This should be done under the supervision of the student’s parents, carers or health practitioner
- allow the use of medication by anyone other than the prescribed student except in a life-threatening emergency, for example, if a student is having an asthma attack and their own puffer is not readily available.

Medication error

If a student takes medication incorrectly, staff will endeavour to:

Step	Action
1	If required, follow first aid procedures outlined in the student’s Health Support Plan or other medical management plan.
2	Ring the Poisons Information Line, 13 11 26 and give details of the incident and the student.
3	Act immediately upon their advice, such as calling Triple Zero “000” if advised to do so.
4	Contact the student’s parents/carers or emergency contact person to notify them of the medication error and action taken.
5	Review medication management procedures at the school in light of the incident.

In the case of an emergency, school staff may call Triple Zero “000” for an ambulance at any time.

COMMUNICATION

This policy will be communicated to our school community in the following ways:

- Provided to staff at induction and included in staff handbook/manual
- Discussed at staff meetings/briefings as required
- Made available publicly on our school website
- Made available in hard copy from school administration upon request.

REVIEW CYCLE

This policy was last updated on 17.06.2023 and is scheduled for review in 17/06.2024 (This policy is considered operational and does not require school council approval)
